About CMU

In 1958, China Medical University (CMU) was established by three traditional Chinese doctors in Taichung, Taiwan. Once named China Medical College, CMU was the very first non-profit academic institution in Taiwan offering degree programs in Chinese medicine and pharmacy. With expanded programs and increased faculty, the institution became as China Medical University in 2003. During the past few decades, the university has steadily grown into one of the most prestigious medical universities in Taiwan and the Greater China region.

Located in the heart of Taiwan, the Taichung main campus encompasses six colleges in which a variety of higher degree programs are offered in the fields of Western medicine, Chinese medicine, pharmacy, health care, life science, public health, management, and biopharmaceutical and food sciences. Interdisciplinary courses and international degree programs are also available for domestic and foreign students who desire to integrate their learning experiences and expand their horizons.

Chairman Chang-Hai Tsai’s Vision

Moving on its way to become a global leader, in 2013, China Medical University set a goal to reach World Top 400 Universities in three years, and Top 300 in seven years. The words are still ringing in our ears; as a matter of fact, China Medical University achieved its goal to reach Top 400 Universities in two years, manifesting the incredible power, determination, and efficiency of the entire team.

CMU and CMUH are moving forward hand-in-hand. Our vision is to become the global powerhouse of Western and Chinese medicine and pharmacy in both basic research and medical services. With the enormous effort made by Chancellor Lee and the entire faculty and staff, CMU strives to achieve excellence in all aspects of research, to provide the highest quality of teaching, and to equip our students with competence, compassion, and a solid sense of social responsibility.

Chancellor Wen-Hwa Lee’s Welcome Message

China Medical University is approaching its sixty-year birthday. I, as the current Chancellor carrying forward the leadership and endeavors by the Board of Trustee and the successive Chancellors, am pleased and proud to share this bliss with all of you today.

China Medical University has struck an incredible balance between what was once assumed to be mutually exclusive: it embraces medical traditions yet stimulates innovation; it subscribes to specialism yet prescribes an interdisciplinary education; it thrives upon biomedicine yet prospers through humanities. With unshakable solidarity of our dedicated faculty and staff, China Medical University is becoming the powerhouse of Western and Chinese medicine and pharmacy. I invite you to join us in the mission to triumph over the impossible and to envision the unimaginable.

Teaching Excellence
In 2013, CMU was entitled as the model university for Teaching Excellence Project in Taiwan, as it received the highest amount of funding for four consecutive years since 2010. Such honorable title well reflects CMU’s long-term objective of being “a globally leading university with highest teaching quality.” Our faculty members strive to excel in teaching, curriculum design, and pedagogical innovation to ensure our students receive the best quality of education. Moreover, the China Medical University Hospital (CMUH) system has been a strong support to our teaching and research goals. Today, CMUH consists of several integrated medical centers to provide advanced health care services by always upholding the “patient-centered” spirit. CMUH constantly recruits prestigious specialists/scholars and cooperates with academic institutions in various fields of biomedicine to benefit our students’ training and the public’s welfare.

Recent World University Rankings

- **2015 Times World University Rankings (Top 5 in Taiwan)**: No. 401-500
- **2015 Times Asia University Rankings**: No. 67
- **2015 Times BRICS & Emerging Economies Rankings**: No. 44
- **2015 QS World University Rankings by Subject - Pharmacy & Pharmacology**: No. 101-150
- **2015 QS World University Rankings by Subject - Medicine**: No. 251-300
- **2015 Academic Ranking of World Universities (Top 3-5 in Taiwan)**: No. 363
- **2015 Academic Ranking of World Universities in Clinical Medicine and Pharmacy**: No. 153

It is worth noting that, combining the above world University ranking performance in 2015, CMU ranked as Top 3 to 6 out of 157 Taiwanese universities in total, Top 1 among the private universities.
Globalization
New Experiences and New Horizons

Since the turn of the century, it has long been believed that a university should bridge the domestic society and the outer world. Aiming to be one of the nexus of global cooperation, CMU devotes itself to international education, providing optimal opportunities for academic and cultural exchanges, and overseas study programs that support faculties and students to grow into talented persons or researchers with great vision.

The number of students and faculties who joined the inbound and/or outbound international programs is increasing year by year. In addition, the featured International Student Exchange Program (ISEP) launched in 2013 has attracted students from our worldwide partner universities to experience the in-depth professional curriculum and exciting cultural events in Taichung!

International Degree Students

The Office of International and Public Affairs (OIPA), reorganized in August 2014, is in charge of promoting CMU’s international status. Passionate and committed staff members work together and lay down the runway to the future for both domestic and international students.

We have been active in recruiting bright international students and building long standing relationships with prestigious universities worldwide. Our dedication in international engagement is demonstrated by the steadily growing number of sister universities each year.

Sister Universities

Asia  America  Europe  Oceania  Africa
Emphases of Our Education

China Medical University not only provides educational training that directly pertains to empirical use, but also stresses the more intangible, indoctrination of the four basic values: compassion, prudence, diligence, and integrity that have been manifested to be best lifelong assets. In addition, these four values also well match the four fundamentals of the Medical School Objectives Project (MSOP, AAMC Report 1, 1998): altruistic, skillful, knowledgeable, and dutiful.

University Mottos

Compassion  By always keeping in mind the importance of respecting patients’ welfare and medical ethics, students demonstrate compassion by empathizing with their prospective patients, whose welfare is what they prioritize under all circumstances.

Prudence  We provide ample opportunities of engagement in highly professional practices, during which students must learn to be prudent and meticulous to warrant the safety and welfare of all participants; we believe that prudence is what perfects proficiency.

Diligence  Our intensive and high quality training poses a reasonable challenge for students to diligently monitor their own learning. A high probability is that such diligence and self-autonomy may translate into a decisive advantage in the development of their future career.

Integrity  With compassion, prudence, diligence and unparalleled expertise, students yet need integrity to become fully contributing members of society. With a strong emphasis on medical ethics, we enforce holistic training that engrains a faithful adherence to the highest moral standards and the respect for human rights.
Building up a Bright Future

As an old Chinese saying goes, it takes ten years to grow a tree, yet it takes a hundred years to cultivate a person. China Medical University insists that a university should cultivate compassionate leaders who have uncompromised integrity as medical professionals in the fields of Chinese and Western medicine.

If China Medical University is the soil, then the students are the joyous sprouts. They thrive upon Chinese and Western medicine, and upon a higher cause: sixty years, our alumni have grown into blossoming trees that have made fruitful contributions to society in diverse areas of professions.

Chairman of the Board of Trustees, China Medical University.

The Scepter of China Medical University, held by Chancellor Lee in the photo, represents CMU’s academic prestige and the four mottos. During the hooding ceremony exclusively for postgraduates, the Scepter made its first debut as a tradition of honor, showing the University’s determination to be a global leader.
CMU as the higher education institute in Taiwan who established:

- The first College of Chinese Medicine in a medical university.
- The first Master Program in Health Services Management.
- The only Chinese Herb Garden on campus.
- The only specialized museum in Chinese herbs and medicine, Lifu Museum of Chinese Medicine.
- The largest medical center and teaching hospital in Central Taiwan.
- The first Hooding Ceremony exclusively for postgraduate students.
- The first Master Program in Pharmaceutical Manufacture.
